Time to Shine

Photo Credit: allmoviephoto.com

One of my favorite actresses is Cate Blanchett and I especially love her as a red head (ala [Benjamin Button](#)). If you ever wondered (and there was a lot of time to wonder in that film) how her hair stayed so healthy under all those bright lights and after all that color and remained so shiny in the film...[Kenra](#) products. I heard it straight from the on set stylist.

We're all in luck. [Kenra](#) has just launched two new shine products for Spring/Summer, Kenra Shine Spray and Kenra Shine Serum. Shine Spray is a superfine aerosol mist that controls frizz and flyaways and UV protectants to help guard hair color from fade and oxidation, so spray it on before you head out in the sun. Shine Serum is a lightweight, humidity resistant serum that minimizes breakage and provides thermal protection from heat styling tools. Both eliminate frizz and smooth the hair, a definite necessity for me after spending time in any body of water be it the pool or the ocean. Another B.I.G feature I love, the sleek, simply elegant packaging works with any bathroom decor and looks quite elegant on the shelf.

Kenra products are only available in professional salons, so you know its got to be good.
