

Beauty 911

Want answers to your hair care problems? You've come to the right place. This month we take a look at defrizzers.

Are there any defrizzers that also add tons of shine?

Curlfriends Tame Smoothing Serum not only tames unruly frizz and controls flyaways, but also adds intense shine. Bio Ionic Super-Hydrator Weightless Shine Sealer is a lightweight, shine-enhancing polish that blends the lightest silicones and the Supercharged Natural Ion Complex, an advanced micro-milled blend of rare natural Japanese minerals.

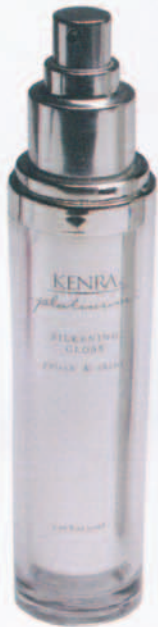

I want my defrizzer to work double-time: smooth the hair while reducing drying time. Is there anything out there that fits the bill? Paul Mitchell Skinny Serum can do the trick. It smooths the surface and tightens hair diameter; it conditions, seals, and protects; and, of course, reduces drying time.

I'm looking for a defrizzer that will protect my clients' hair from sun damage. Is there anything out there?

Barex Re-Define Crème is an all-in-one, ultralight cream that tames the wildest frizzes and curls, all the while protecting hair from the sun thanks to built-in sun filters.

Is there a product that will work with my hot tools to help tame frizz?

Kenra Silkening Gloss smooths dry ends and, when used in conjunction with thermal styling tools, creates the ultimate in shine and condition.

How about a defrizzer that helps block humidity?

Options by Framesi Way Smooth Frizz Cream has a lightweight formula that protects hair from the humidity that can cause further frizz. It smooths dry, textured hair while infusing it with moisture and shine.

I'm looking for a defrizzer that actually improves the hair. Any suggestions?

Alterna Anti-Aging Serum creates a smoother texture and restores elasticity by reversing the aging process with the Alternite Complex, which contains a natural extract, cytokinase, and Vitamin E. Wella BIOTOUX Frizz Control Cream with jojoba oil strengthens and nourishes hair to improve its texture and reduce tangles.
